

DemDx Clinical Release Notes - updates based on NICE guidance updates April 2025 - July 2025

All new NICE Guidance and CKS updates in the last quarter have been reviewed by the DemDx Clinical Governance committee to ensure our clinical content remains up to date and complies with national best practice. The following topics were deemed to be relevant to primary care and changes have been made to align DemDx platform content with the latest clinical guidance.

Acute Abdominal Pain (New NICE CKS topic)

- DemDx content reviewed and updated in line with the new NICE CKS topic.

Hand, Foot & Mouth Disease (NICE CKS)

- New advice to consider oromucosal gels/lozenges/sprays for symptom management (adult and child) added.

Myalgic Encephalomyelitis/Chronic Fatigue Syndrome (New CKS Topic)

- DemDx content reviewed and brought in line with NICE CKS updates for Adult and Child CFS/ME.
